

AMENDMENTS TO THE CLAIMS

1. (Previously Amended) A plain bearing having an overlay alloy layer at a sliding surface of the plain bearing, the plain bearing comprising a layer of a strong backing material, a layer of a first bearing alloy bonded to the strong backing material and a layer of a second bearing material comprising said overlay material bonded to said first bearing alloy layer, characterised in that said second bearing material comprises essentially pure tin without any other metallic alloying constituents, other than unavoidable impurities, having included in the matrix thereof an organic levelling agent.
